

Save Time and Money with Trim Truss

- » Each end trimmable up to 12"
- » Length labeled on each Truss
- » Labeled 'TOP' for proper installation

Stocking: 16" 6'-26'

*12", 14", 18", and 24" are
available for special order*

Increased Productivity

- » No waiting on foundation measurements
- » No need to preorder weeks ahead
- » Custom fit on site
- » Contractors can install utilities without having to cut holes – saves on construction time and avoids costly I-Joist repairs

*2x4 Plated Truss combined with trimmable
3/4" Pine I-Joist insert on each end*

Benefits of Wide Truss

- » Provides framers with more nailing surface for sub-floor attachments and avoids "shiners"
- » Allows for wider O.C. spacing without sacrificing sub-floor performance
