| LCU | 36" | 6-9/16" | Brz - RDS Alum Deck Only |

The jobsite is a tough world for a sill. Conditions are never perfect and your sill is going to take a hit. Stop paying for it and start planning for it with the Replaceable Deck Sill (RDS).

RDS is the first and only sill system that eliminates the costly, time-consuming and labor-intensive task of addressing sill deck damage. Plus, RDS helps quickly identify non-level openings and address imperfect site conditions in a matter of minutes.

3 EASY STEPS

- 1. Bend**
Remove sill cap. Using a putty knife, bend front edge of deck away from substrate.
- 2. Remove**
Once deck is fully disengaged along the length of the sill, simply slide the deck out, away from the sill.
- 3. Replace**
Slide new deck onto substrate. Tap into place with a mallet.
