

# WaterGuard Self Adhered Rain & Ice Protection

WaterGuard Rain & Ice is a specially designed and manufactured, self-adhering underlayment for use on steep slopes and as a flashing membrane in areas susceptible to leaks, such as valleys, roof-to-wall transitions, and around vents, curbs, skylights and other roof penetrations.

- ✓ *The perfect economical solution for eave and valley protection from water penetration and ice damming*
- ✓ *Granulated surface creates an enhanced skid resistant walkable surface*
- ✓ *Highly pliable fiberglass reinforced material adds high strength and conformability for corners and tight areas*
