INSTALLS FASTER THAN FIBER CEMENT

Put to the Test

RSMeans tested LP® SmartSide® Trim & Siding products against fiber cement products, utilizing the same professional crew on two identical structures in a weather-controlled environment.

See the
time-lapsed
study!

The Results

Overall, LP® SmartSide® Lap and Trim products installed

30% FASTER
than fiber cement lap and trim

LP SmartSide®
TRIM & SIDING

- LP® SmartSide® Lap installed 21% faster
- LP® SmartSide® Trim installed 47% faster
- LP® SmartSide® Shakes installed 58% faster
- LP® SmartSide® Lap reduced waste by 7% compared to fiber cement

THE LP® SMARTSIDE® DIFFERENCE

Made using engineered wood strand technology, LP SmartSide products are less prone to breakage, helping minimize waste and speed installation

LP SmartSide products are easier to work with and can be cut using standard woodworking tools

LP SmartSide lap features 16 ft lengths, which may lead to fewer cuts and seams

LP SmartSide lap weighs 45% less than fiber cement, is more flexible, and easier to carry
