

The Cemboard® Advantage

**Unmatched Quality, Value &
Longer-lasting Performance**

Cemboard® siding is tough because it's made from one of the toughest siding materials available: fiber cement. Our product is incredibly durable and stands up to the nastiest weather you can imagine. Combine this toughness with the attractive look of real wood and you can see what makes Cemboard siding better than other siding materials. For real siding value, choose the longer-lasting beauty of Cemboard fiber cement siding.

FOR FACTORY-BUILT HOMES

Choose—

The attractive look of wood.

Cemboard® siding's deep cedar-grain texture provides a genuine wood appearance. Combined with the superior durability of fiber cement, Cemboard siding adds longer-lasting beauty, quality and value to your homes other siding materials simply can't match.

Less maintenance.

Cemboard fiber cement siding holds paint longer than wood siding, and resists damage caused by mold and moisture, such as swelling, warping, and cracking. Cemboard siding provides a longer-lasting, lower maintenance exterior.

The Cemboard siding solution.

Why put up with the hassle of dealing with multiple suppliers and manufacturers? Cemboard siding, trim, and soffit give you everything you need from one proven, reliable manufacturer. You'll get consistent product quality with every delivery, covered by some of the most comprehensive warranties in the business.

Cemplank®

Lap Siding

Cemplank® lap siding is an attractive and durable alternative to vinyl and wood-based siding. The cedar grain texture of Cemplank lap siding provides a wood appearance with proven fiber cement performance.
