

# FELT BUSTER®

HIGH-TRACTION SYNTHETIC ROOFING FELT

Quality roofing underlayment is critical for helping to prevent wind-driven rain from infiltrating under the roof's shingles and potentially damaging the home's structure and interior. Traditional asphalt felt underlayments can tear easily and absorb moisture, leading to wrinkling that "telegraphs" through the shingles.

## HOMEOWNER AND PROFESSIONAL QUALITY CHOICE

- **Durable Construction**  
Non-asphaltic, polypropylene construction for long-lasting performance (unlike conventional felts that can disintegrate over time)
- **A Better-Looking Roof**  
Lies flatter than typical felts and avoids "telegraphing" of wrinkles, which can detract from the look of your new roof
- **Enhanced Walkability**  
Special spunbound surface helps provide increased traction vs. traditional asphalt felts
- **Tough Synthetic Construction**  
Resists tearing underfoot and in high winds
- **Easier to Work With**  
Super-lightweight, 10 square, 48" (1.23 m) wide roll (vs. typical 36" [9.14 mm] wide felt rolls)
- **Cooler to Work On**  
Medium-gray surface is up to 30 degrees cooler than typical black asphalt felts\*\*

DW SKU#	DESCRIPTION	SIZE
GAFFB	GAF FELT BUSTER HIGH-TRACTION SYNTHETIC ROOFING FELT	10 sq. 48" x 250' Covers 1,000 sq. ft.

49 ROLLS PER PALLET

\*\* Based on GAF testing with underlayments installed on plywood deck at 90°F (32.2°C) ambient temperature and left exposed to direct sunlight.
