

POCKET DOOR FRAME

LVL PRIMED MATERIALS

Provide Privacy and Separate Rooms with Pocket Doors

Pocket doors are a perfect solution for homeowners who are wanting to save floor space or have the option for privacy in a room. Because these doors slide into the wall there is no disruption of the room's flow.

DW's pocket door frame is built using primed LVL materials and metal stiffeners to provide superior strength, structural integrity, and easy installation.

CoxUSA heavy-duty tracks and hardware, including four ball bearing rollers, come standard with every frame to provide smooth, quiet, and easy operation of heavy doors. Handle hardware is not included.

These pocket door frames are rated for up to 200lbs and can accommodate 1-3/8" or 1-3/4" doors.
