

T-TEC LSL WALL FRAMING

Engineered Wood Products

FASTER INSTALLATION. QUIETER BUILDS.

T-TEC LSL is a top choice for strong and reliable wall framing. It's built to stay straight and resist warping or twisting, making it perfect for long hallways, tall walls, and walls that need to support cabinets.

With square ends and a smooth, consistent profile, T-TEC LSL helps builders use every inch of each board, reducing waste and saving time. This makes it easier to work with, while ensuring a sturdy, long-lasting structure.
